

Oil and Gas Products

Pressures to 30,000 psi

MAXIMATOR has been designing and manufacturing specialty products to the high pressure market for over thirty years and has a worldwide reputation for quality and reliability.

Oil and Gas Products feature:

- ▶ Annealed 316 stainless steel construction meets NACE MR0175.
- ▶ Rising stem designs, both solid and 2 piece configuration available.
- ▶ Metal-to-metal seating achieves bubble-tight shut-off.
- ▶ Carbon-reinforced PTFE with metal back-up rings offers reliable stem to body sealing.
- ▶ Stem sleeve and packing gland materials have been selected to achieve the optimum corrosion resistance to withstand offshore environments.
- ▶ Safety weep holes for all pressure connections and packing area.
- ▶ Seven different valve body patterns, with choice of vee or regulating type stem tip.

MAXPRO offers a diverse line of high pressure equipment for all your Oil and Gas applications. Not all options can be applied to the standard valve series, see specific product pages for ordering options.

Note: When selecting multiple items, the pressure rating would be that of the lowest rated component.

Sour Gas Valves

Pressures to 22,500 psi

MAXIMATOR® US
MAXPRO Technologies

www.maxprotech.com

MAXIMATOR Sour Gas valves are designed for oil and gas service where H₂S is present. All valve bodies are made from annealed 316 stainless steel, with K-Monel stems in compliance with NACE MR0175. These needle valves with metal to metal seats have a high level of safety and reliability under harsh operating conditions. These valves may be used both with gases and liquids.

Traceability is ensured through extensively documented data (batch number, maximum pressure, material number, type designation). All Sour Gas components are supplied with glands and collars unless otherwise specified.

O.D. Size (in.)	Connection Type	Orifice Size (in.)	Rated Cv*	Pressure/Temp. Rating (psi @ R.T.)* *
1/4	4HF	0.094	0.12	22,500
3/8	6HF	0.125	0.23	22,500
9/16	9HF	0.125	0.33	22,500

* Cv values shown are for 2-way straight pattern vee stem valves.
For 2-way angle patterns, increase the Cv value by 50%.

** See page 2 in the Technical Section for Pressure/Temperature Rating Chart.

Gauge Valves

Pressures to 36,000 psi

MAXIMATOR® US
MAXPRO Technologies

www.maxprotech.com

MAXIMATOR Gauge Valves are designed and manufactured to exact standards, assuring the highest product quality and reliability for use in both the sour gas and sweet service applications. Sour Gas applications where H₂S is present, use the “SOG” suffix (22,500 psig service).

For sweet service applications, the standard 316 material is preferred. These valves are engineered for high pressure line sampling and instrument calibration for working pressures to 36,000 psig.

Gauge Valve Features:

- Four 9/16" high pressure female connections are compatible with standard API test and gauge connections.
- Metal to metal stem and seat design provides bubble tight shut off.
- Valves available in both 316 cold worked, and 316 annealed stainless steel materials.
- Carbon reinforced PTFE packing with metal back-up rings located below the stem threads offers trouble free operation.
- Safety weep hole for all pressure connections and packing area.

Repair Kits

Consult your **MAXPRO** representative for repair kits and valve bodies. Refer to the Tools and Installation section for proper maintenance procedures.

All dimensions are for reference only and are subject to change.

See page 2 in the Technical Section for pressure/temperature rating chart.

All SOG components are furnished with collars and glands, to receive without, add the suffix “WO” to the catalog number, “22V6H002-SOG-WO.”

All general terms and conditions of sale, including limitations of our liability, apply to all products and services sold.
MT R4 Dec 2109

Bleed Valve Features:

- 9/16" high pressure male connection compatible with standard API test and gauge connections.
- 1/8" NPTF tapped vent port for safe atmosphere plumbing.
- One piece stem design with positive blow out prevention.
- Stainless Steel Tee handle for ease of operation.
- One piece 316L body construction for ease of installation and corrosion resistance in a wide variety of applications.
- Safety weep hole in packing area.

Maximator Bleed Valves are designed and engineered for use with Maximator Gauge Valves for high pressure venting before instrument calibration is performed. These valves can be purchased for both the sour gas and sweet service applications. Sour Gas applications where H₂S is present, use the "SOG" suffix (22,500 psig).

For sweet service applications, the standard 316 material valve is preferred.

NOTE: These bleed valves are designed for venting only. The 1/8" NPT outlet port must vent to atmosphere. If a pressureized outlet is required, Maxpro recommends using the 36V or 22V series needle valves for such piping applications.

Sour Gas Fittings

Pressures to 30,000 psi

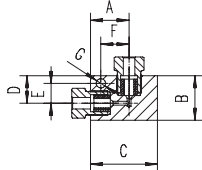

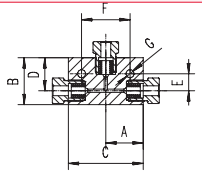

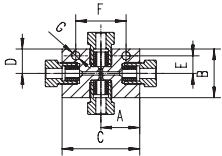

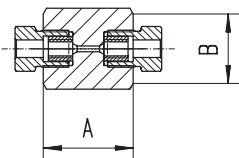

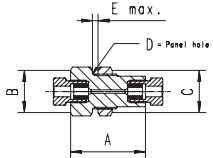

MAXIMATOR® US
MAXPRO Technologies

www.maxprotech.com

MAXIMATOR Sour Gas fittings are designed for oil and gas service where H₂S is present. All pressure containing components are made from annealed 316 stainless steel material in compliance with NACE MRO175. All High Pressure fittings are supplied with collars and glands. Mounting holes are standard on all elbows, tees and crosses.

8 All SOG components are furnished with collars and glands, to receive without, add the suffix "WO" to the catalog number, "22V6H002-SOG-WO."

All general terms and conditions of sale, including limitations of our liability, apply to all products and services sold.
MT R4 Dec 2109

MAXIMATOR Sour Gas Tubing is designed for oil and gas service where H₂S is present. All tubing is seamless annealed 316 stainless steel material in compliance with NACE MR0175. This tubing is made under strict manufacturing and quality control standards and inspections, with dimensional tolerances to match the requirements of the high pressure coned and threaded connections.

Tubing Tolerances

Normal Tubing Size (in.)	Tolerance O.D. (in.)
1/4	0.248 / 0.243
3/8	0.370 / 0.365
9/16	0.557 / 0.552

Sour Gas Check Valves

Pressures to 30,000 psi

Sour Gas O-Ring Check Valves

MAXIMATOR o-ring check valves provide high quality directional flow control and bubble tight shutoff for liquids and gases. These check valves are not to be used as a relief device. The cracking pressure of the o-ring check valves is approximately 10 psig.

Materials.

Body, cover, poppet, cover gland: annealed 316 stainless steel
Spring: Inconel X-750
O-ring: Viton "A" (-4 °F to 392 °F)

Sour Gas Ball Check Valves

MAXIMATOR ball check valves prevent reverse flow where bubble tight shutoff is not mandatory. Check valves are designed to operate to 660 °F. These check valves are not to be used as a relief device. The cracking pressure of the o-ring check valves is approximately 10 psig.

Materials.

Body, cover, poppet, cover gland: annealed 316 stainless steel
Spring: Inconel X-750
Ball: 300 series stainless steel

Catalog Number	Connection Type	Pressure Rating (psi)	Orifice (in.)	Rated (Cv)	Dimensions (in.)	
					A (Hex.)	B
Sour Gas O-Ring Check Valves						
300C4H-SOG	4HF	30,000	0.094	0.15	1.19	3.40
300C6H-SOG	6HF	30,000	0.125	0.28	1.19	3.81
300C9H-SOG	9HF	30,000	0.187	0.63	1.63	4.61
Sour Gas Ball Check Valves						
30BC4H-SOG	4HF	30,000	0.094	0.15	1.19	3.40
30BC6H-SOG	6HF	30,000	0.125	0.28	1.19	3.81
30BC9H-SOG	9HF	30,000	0.187	0.63	1.63	4.61

CAUTION: FREQUENT INSPECTIONS of O-Rings are necessary to ensure proper service of the check valve. O-Rings have shown satisfactory service life in testing, however different service conditions may lead to variations in cycle and shelf life.

All SOG components are furnished with collars and glands, to receive without, add the suffix "WO" to the catalog number, "22V6H002-SOG-WO."

Sour Gas Dual-Disc Line Filters

MAXIMATOR dual-disc line filters are used to filter process fluids in high pressure systems. This design helps remove the large particles first through a coarse primary disc, which then allows a secondary disc to provide a smaller micron filtration. These filter elements are designed to withstand pressure surges without cracking, flaking, or rupturing. Filter elements come standard in the following micron sizes: 5/8, 8/30, 30/56 (secondary/primary). Filters are rated for temperatures -60 °F to 660 °F. All line filters come with glands and collars.

Materials

Body: cover, cover gland: Annealed 316 series stainless steel
Element: 300 series stainless steel

Sour Gas Cup-Type Line Filters

MAXIMATOR cup-type line filters are used when maximum filtration surface area and a single micron size element is preferred. This design increases the filter area as much as 6 times the area of the disc type filter, and will permit higher flow rates with a lower pressure drop, and longer intervals between element changes. Filter elements come standard in 5, 30, or 56 micron sizes and are easily replaced. Filters are rated for temperatures -60 °F to 660 °F. All line filters come with glands and collars.

Materials:

Body, cover, cover gland: Annealed 316 series stainless steel
Element: 300 series stainless steel

All SOG components are furnished with collars and glands, to receive without, add the suffix "WO" to the catalog number, "22V6H002-SOG-WO."

All dimensions for reference only and are subject to change.

NOTE: It is recommended that all liquids entering a high pressure system be thoroughly cleaned, maximator filters are designed to remove small amounts of process particles. Pressure differential should not exceed 1000 psi across the filter elements.

Sour Gas Adapters & Couplings

Pressures to 30,000 psi

MAXIMATOR® US
MAXPRO Technologies

www.maxprotech.com

MAXIMATOR sour gas adapters and couplings are designed to join a variety of pressure connections where H₂S is present. All adapters are made of annealed 316 stainless steel material that meets NACE MR0175 specification. If collars and glands are not required, simply add "-WO" to the catalog numbers below.

Instructions

Find the male connection you want on the adapter in the "A" column and the female connection of the adapter in the "B" column. At the intersection of the two columns is the appropriate catalog number.

Adapter (male x female)
